

20L Protect+

A versatile and convenient sharps disposal solution, the 20L Protect+ combines both moderate volume and lightweight construction. The 20L Protect+ is the ideal sharps container for larger healthcare facilities or those generating moderate to high waste volumes, e.g. hospital ward environments and blood collection centres. With rear moulding to suit most pre-existing brackets, the container is suitable to be placed on walls or trolleys as required. Manufactured by combining recycled plastics and weighing just 1.6Kg, the lightweight construction also allows for easy and convenient transportation on trolleys such as Phlebotomy, Emergency and Medicine trolleys, whilst providing moderate capacity.

Product Information

Product Code

AS486-20 (Single-Use Sharps Container)

Material

Manufactured combining both reprocessed and recyclable materials

Nominal Capacity

19.6 Litres (Safe Recommended Usable Space)

Capacity

23.2 Litres (Maximum Container Capacity)

Weight

1.6 Kilograms

Dimension

W 365mm x H 486mm x D 198mm

Product Certification

AS 4031, ISO 23907

Product Treatment:

Antimicrobial Protection Technology
