

30L Protect+

The 30L Protect+ provides the ultimate in large volume sharps waste disposal. With a capacity of 30.5L, the 30L Protect+ is the ideal sharps solution for large volume facilities. It is suitable for most major healthcare facilities, perioperative environments, hospital wards and blood banks producing considerable volumes of sharps waste and laparoscopic instruments requiring disposal. Manufactured by combining recycled plastics and weighing just 2.2kg, it is lightweight and can be conveniently transported with a top handle, attached to a trolley where required or able to be fitted to most pre-existing wall brackets.

Product Information

Product Code

AS551-30 (Single-Use Sharps Container)

Material

Manufactured combining both reprocessed and recyclable materials

Nominal Capacity

30.5 Litres (Safe Recommended Usable Space)

Capacity

33.5 Litres (Maximum Container Capacity)

Weight

2.2 Kilograms

Dimension

W 365mm x H 559mm x D 198mm

Product Certification

Manufactured to conform to AS and ISO standards

Product Treatment:

Antimicrobial Protection Technology
